

# Tealight-Lamp, A LED Lamp Powered by a Tea Candle, Not Electricity, and Not Battery

## Description

The new Tealight-Lamp is a LED Lamp powered by a tea candle, not electricity and not battery not pollution. The secret behind is that the LED lamp come with a built-in miniature electricity generator! Thanks to the thermoelectric technology, Thermonamic`s engineer team designs and builds up a mini size generator in the world, which can convert the heat of a burning tea candle directly into the electricity. The Tealight-Lamp provides you the lighting that is brighter than 24 tea candles can offer in same time, brightly enough for comfortable reading. The unique mini and light power-on-demand thermoelectric generator lights up our Tealight-Lamp almost 4 hours per a tea candle, well suited for the off-grid camper, backpacker, hunter, or fisherman, and for those whose work takes them into not electricity areas. In situations where power is lost at home, the Tealight-Lamp is a must-have item for home emergency preparedness, an alternative to battery powered lighting, not charging not pollution.

## Geometric Characteristics (Dimensions in millimeters)

**Specifications:**

Part Number		TeaL-001
Output Power		0.6-1.2 W, depending the flame size and ambience temperature
Dimension / mm	Main part	112 × 83 × 114
	Wax	Φ = 38 ~ 40
Weight / g		350

**Instructions in use:**

Step 1

Step 2

Step 3

Step 4

Working

Step 1. Place the Tealight-Lamp on a table or flat surface.
